Sir:

There is an error on the filing receipt that was issued for this application in that the filing date is incorrect, as indicated in red on the accompanying copy. As outlined in the Reply to Notification of Missing Requirements filed January 31, 2002 (a copy of which is enclosed), the Declaration was filed on January 4, 2002, and a copy of the return postcard was provided as evidence. Therefore, applicant believes that this application should be granted a filing date of January 4, 2002-because January 4, 2002 is the date on which the requirements for entry into the national phase were fully met. Please amend the records of the Patent and Trademark Office to reflect a filing date of January 4, 2002 and issue a corrected filing receipt and a corrected Notice of Acceptance.

Dear Sir / Madam

RE: Information Disclosure Statement By Applicant
for National Stage Application Number 10/168,960 out of PCT
Application No PCT/AU01/00013 in the Name of Flixco Pty Limited.

Please find following and also by courier;

- Information Disclosure Statement By Applicant, form PTO/SB/08A for US National Stage Application Number 10/168,960

By courier only;

- Copy of PCT International Search Report for International Application No. PCT/AU01/00013
- Copy of the International Preliminary Examination Report for International Application No. PCT/AU01/00013
- Copy of letter to IP Australia dated 28 September 2002, regarding the relevance of United States Patent No. 5,572,650
- Copies of each of the documents cited by the international search report; US 5572650A, US 5799295A, US 4362928A, US 5566330A and WO 9946711A

Concise explanation of relevance for the examiner

The Information Disclosure Statement lists all of the citations from the International Search Report. We do not consider that any of these cited

documents are material to the patentability of this US National Stage Application No. 10/168,960.

The letter to IP Australia on 28 September 2001 explains the difference between the original claim set of PCT Application No. PCT/AU01/00013 and US Patent 5572650A which was cited as a category X document in the International Search Report. The rest of the cited documents of the International Search Report were in category A and are not considered to be of particular relevance.

We have also included the International Preliminary Examination Report which examined a revised set of claims to the set on which the International Search Report was performed. It is this revised set of claims from which the US national phase claims have been derived. The only modifications to the US claim set being the deletion of two omnibus claims and the removal of multiple dependencies between claims. We note that the International Preliminary Examination Report concluded that "None of the citations in the search report, individually or in combination, disclose the features of the claims".

Yours faithfully,

Peter Bobroff
Director
